

VARIABLE HYDRO BOOSTER UE-MONO

Introducing:
User-friendly controller

UE-MONO Controller
enhance VFD operation

APPLICATIONS

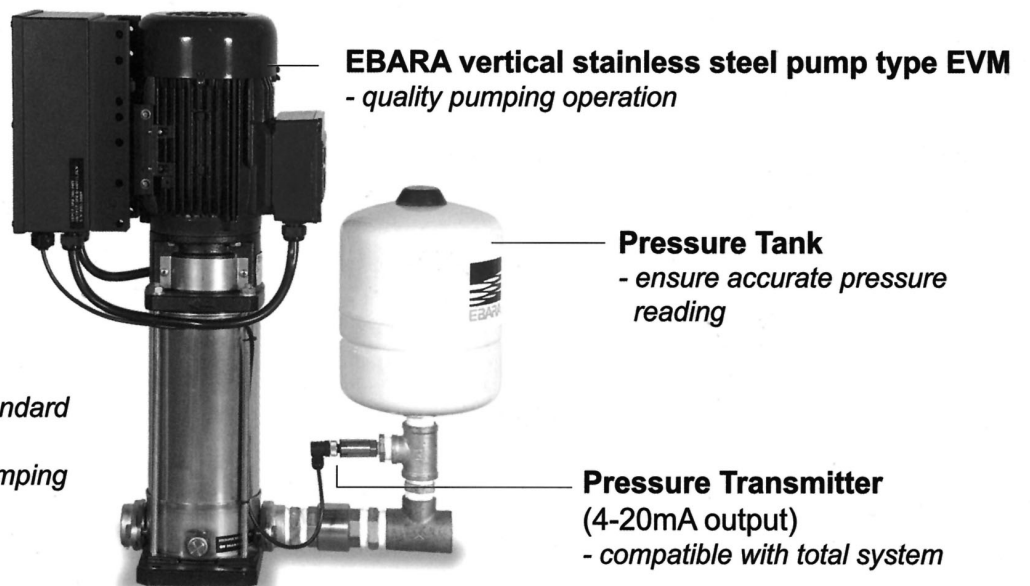

- Industrial water boosting.
- General water supply.
- Domestic boosting application.

SPECIFICATIONS

- Input : 3 phase, 415V 50Hz/60Hz
- 0.75 kW 15kW available
- Suitable for EBARA vertical pump usage
- Option : EBARA horizontal pump

FEATURES / BENEFITS

- VFD control
- 0.5 ~ 400Hz output
- LAN communication
- Temperature of Pressure Control (PID)

EBARA vertical stainless steel pump type EVM
- *quality pumping operation*

Pressure Tank
- *ensure accurate pressure reading*

Pressure Transmitter
(4-20mA output)
- *compatible with total system*

Inverter / PID controller
- *easily replaceable with standard motor*
- *permits variable speed pumping to suit constant pressure requirement*
